

You are invited to a Project Information Event for our revised plans for Honiley Road Solar Farm

We have revised our plans for a Solar Farm and battery storage facility on land near Honiley Road, CV8 1NP. We are now proposing to develop a much smaller Solar Farm on land west of Honiley Road.

The Solar Farm will still provide renewable electricity for distribution to the National Grid. The revised scheme is equivalent to the electricity demands of approximately 6,000 homes each year of the proposed 40 year operational life, while also providing significant CO₂ savings compared to generation of electricity by non-renewable sources.

The equivalent saving of removing approximately 1,750 cars from the road each year.

The battery storage facility will supply electricity to the electricity network at times of peak energy demand and help make the renewable energy output of the solar farm a secure and reliable part of the UK energy supply.

A SMALLER HONILEY ROAD SOLAR FARM

WE HAVE LISTENED

We had previously submitted plans for a larger solar farm to Warwick District Council and Solihull Metropolitan Borough Council last year. Having listened the opinions of local residents at the public consultation event in September 2021, reading the public consultation responses to the application, and reviewing comments made by statutory consultees, we felt it was appropriate to amend our proposals. As a result, we have significantly reduced the size of the scheme **from approximately 106.23 hectares down to approximately 53.4 hectares – a 49.7% reduction in the proposed development area.**

SEE THE REVISED APPLICATION

We would like to invite you to a Project Information Event where you will be able to discuss with the development team our amended proposals.

DATE AND TIME

**Friday 1st
July 2022
2pm to 7pm**

VENUE

**Wren Hall,
School Lane,
Wroxall, Warwick
CV35 7NF**

**The Council will be
consulting on the
revised proposals.**
